

Kurtleigh Martin

BSc Information Technology Student | Aspiring Software Developer / IT Graduate

Potchefstroom, South Africa | 0791902764 | kurtleighm@gmail.com | [Virtual CV](#)

PROFESSIONAL PROFILE

BSc Information Technology student with practical experience in **C#, .NET MAUI, SQL, Oracle, Python, Java, C++ and ASP.NET Web Forms**. Experienced in building database-driven applications, mobile applications and academic IT solutions, with exposure to Azure SQL, Git/GitHub and networking concepts. Brings additional workplace experience in accounting and administration, supporting strong attention to detail, communication, document handling and professional reliability. Seeking graduate, internship or junior IT opportunities where software development, database, analytical and problem-solving skills can contribute to business value.

TARGET ROLES

Suitable for: IT Graduate Intern, Software Developer Intern, Junior Developer, Application Support Intern, Database Intern, Business/Systems Analyst Intern, IT Support Graduate and Technology Trainee roles.

CORE STRENGTHS

- Software development foundations: C#, object-oriented programming, application logic, debugging and structured problem-solving.
- Database capability: SQL querying, relational database design, stored procedures, Oracle exposure and data-driven application development.
- Professional workplace readiness: email communication, administration, record keeping, donor/program database maintenance and financial-document accuracy.
- Learning agility: able to understand new systems, research solutions independently and apply feedback to improve technical outputs.

TECHNICAL SKILLS

Programming Languages: C#, C++, Python, Java, SQL

Frameworks & Development: .NET MAUI, ASP.NET Web Forms, HTML, CSS, application design, CRUD functionality

Databases: Oracle, SQL Server / Azure SQL, relational database design, stored procedures, data validation

Tools: Visual Studio, SQL Server Management Studio, Git/GitHub, Microsoft Office, basic troubleshooting

Networking: TCP/IP fundamentals, subnetting, VLAN concepts and Cisco Packet Tracer simulations

EDUCATION

North-West University | BSc in Information Technology | 2024 - 2026 (Current)

- Relevant focus areas include programming, databases, software development, systems analysis, networking and IT project work.
- Academic work demonstrates the ability to design solutions, write code, document systems and apply technical concepts practically.

North-West University | Bachelor of Education | 2022 - 2024

- Previous tertiary studies that strengthened communication, planning, presentation and learning-support skills.

Orion Secondary school | Grade 12 | 2021

- Subjects included Mathematics, Business Studies, Computer Application Technology, Accounting and Life Orientation.

SELECTED IT PROJECTS

Eco-Tourism Management Web Application | ASP.NET Web Forms, C#, SQL / Azure SQL

- Developed web-form functionality for managing tours, guides, destinations, reports and system data in an academic/team project environment.
- Worked with SQL tables, stored procedures, database connectivity, navigation flow and user-interface improvements.

Cross-Platform Mobile Application | C# and .NET MAUI

- Built a mobile application using C# and .NET MAUI, applying object-oriented programming principles and user-interface logic.
- Practised structuring application screens, handling user input and developing features according to academic project requirements.

Library Management System | C#, database concepts

- Designed a library-management solution focused on structured data, system logic and practical database interaction.
- Applied core system-development concepts such as data capture, validation, record management and clear program flow.

Fitness Tracking Application | C++

- Created a performance-oriented application using C++, applying structured programming, logic design and testing against requirements.

Network Design Simulation | Cisco Packet Tracer

- Configured and tested a simulated network using IP addressing, subnetting, VLAN concepts and connectivity checks.

WORK EXPERIENCE

Ithemba NPO | Accounting and Administrative Assistant | 2025

- Managed high-volume email communication and donor correspondence in a professional and organised manner.
- Handled accounts payable and receivable tasks and supported month-end close processes.
- Reconciled income and expenses while maintaining accurate financial and administrative records.
- Built and maintained donor and program databases, strengthening data accuracy and record management.
- Demonstrated confidentiality, reliability and attention to detail in a finance and administration environment.

TRANSFERABLE PROFESSIONAL SKILLS

- Communication: able to write professional emails, listen to requirements and explain information clearly.
- Teamwork: comfortable contributing in group projects and supporting shared goals under deadlines.
- Time management: able to balance academic workloads, project deliverables and workplace responsibilities.
- Analytical thinking: able to break problems into smaller parts and use research/testing to find solutions.
- Adaptability: open to learning new software, tools, business processes and technical concepts quickly.

ACHIEVEMENTS & DEVELOPMENT

- Completed practical academic projects involving mobile development, database-driven systems, web applications and networking simulations.
- Gained workplace exposure in administration and finance, supporting accuracy, organisation and professional communication.
- Actively improves technical knowledge by researching new software, following technology trends and practising coding concepts.
